

## FACT SHEET #4

## TIPS FOR A FUNCTIONAL BATHROOM SPACE

### GLASS

---

The use of glass in a bathroom increases the feeling of space and adds clean lines. Glass and mirrors reflect light and will give your bathroom a feeling of decadence and luxury. Wall hung streamlined mirrors that open to storage solutions provide practicality and will declutter your space.

### VENTILATION

---

Keep your bathroom clean and fresh by investing in a high quality fan. This will prevent steam build up on the windows and mirrors keeping your bathroom space looking clean and smelling fresh. There is nothing worse than a dingy area dripping with mould and damp.

### LIGHTING

---

Expert lighting design is a must in your bathroom space. It will not only enhance the feeling of space but can make your bathroom luxurious and provide the ambience that is found in a luxurious spa.

### STORAGE

---

Storage solutions can be built into your bathroom streamlining the look and flow. They provide much needed practical shelving without the bulk. Maximise wall cavities and recesses. We suggest tiling these areas to flow with the angles of your bathroom and provide consistency.

### COLOUR

---

Expert colour advice is a must when designing your space. Tips and tricks from a professional will ensure you achieve your desired look and feel. Whether it's contemporary and modern or vintage chic, the right colour creates the right look. There are many different shades to choose from and an interior colour expert will get the right match for you.
